

Seasons

Mountain View, CA
Senior Center

As a glass artist today, I have a broad range of techniques available for making stained glass windows. The four "Seasons" at Mountain View Senior Center were fabricated at Derix Glass Studio in Germany. The University of Wisconsin, Parkside windows were fabricated at Architectural Glass Art in Kentucky. Both studios have skilled artisans that airbrush or hand-apply my designs with vitreous enamels to plate glass, that is then kiln fired for a permanent painterly effect.
